

9514 CHESAPEAKE DR., SAN DIEGO, CA. 92123

(714) 278-0633 TWX 910-335-1269

**MICROTEK** Inc.

## INSTALLATION

The AMB-32 Memory Board is designed to fit into both the ATARI 400 and 800 Computers. Although installation in the 400 is a simple replacement of the existing 8K or 16K board, it should be performed by qualified personnel as opening the case voids the warranty. Installed in the 400, it allows the user to take advantage of the ATARI 810 Disk Systems and all related programs.

Installation in the ATARI 800 with a 16K RAM Module adds the maximum 48K RAM using only two slots, leaving the third slot open for future expansion.

## WARRANTY

MICROTEK warrants the AMB-32 Memory Board to be free from defects in material and workmanship for a period of one year from the date of purchase. During the warranty period, MICROTEK will, at its option, repair or replace at no charge, any defective components, provided that the defective board is returned prepaid to MICROTEK, Inc., 9514 Chesapeake Drive, San Diego, California 92123. Before returning a unit for repair, a Return Authorization Number must be obtained from MICROTEK (714-278-0633). A complete description of the reason for return must accompany the printer. A nominal handling charge will be made on units for which a Return Authorization is not obtained. This warranty does not cover damage caused by accident, misuse, misapplication, or unauthorized service or modification. Warranty is VOID if not registered within 15 days of purchase date.
